Commander's Foreword

The purpose of the manual

The nature of autonomous warfare

The commander's responsibility

How to Use This Manual

Doctrine

Tactics

Techniques

Procedures

Quick-reference sections

Field Manual Principles

Command with intent

Maintain information superiority

Preserve combat power

Exploit autonomy
Adapt continuously

PART I — THE AUTONOMOUS BATTLEFIELD

Chapter 1 — The New Battlefield

Autonomous warfare
Human-machine warfare
Multi-domain combat
Battlefield complexity
Information dominance

Chapter 2 — The Commander

Commander's role
Strategic thinking
Tactical thinking
Decision-making
Risk management
Responsibility

Chapter 3 — Command Intent

Intent philosophy
Desired outcome
Constraints
Priorities
Rules of engagement
Autonomy boundaries

Chapter 4 — The Autonomous Force

Ground forces
Air forces
Naval forces
Command units
Experimental forces

Chapter 5 — The Operational Environment

Terrain
Weather

Visibility
Infrastructure
Airspace
Water
Information environment

PART II — COMMAND AND CONTROL

Chapter 6 — Command Structure

Strategic
Operational
Tactical
Fleet
Group
Unit

Chapter 7 — Command Networks

Command links
Data links
Relay units
Communication range
Network structure

Chapter 8 — Command Authority

Authority
Ownership
Delegation
Restrictions
Loss of command

Chapter 9 — Orders and Intent

Creating orders
Assigning orders
Modifying orders
Cancelling orders
Conflicting orders

Chapter 10 — Priority Management

Mission priority
Objective priority
Threat priority
Survival priority
Resource priority

Chapter 11 — Rules of Engagement

Engagement restrictions
Target restrictions
Aggression
Risk tolerance
Civilian restrictions

Chapter 12 — Command Failure

Communication loss
Unit isolation
Network degradation
Conflicting authority
Autonomous fallback

PART III — INTELLIGENCE AND INFORMATION WARFARE

Chapter 13 — The Information Battlefield

Chapter 14 — Sensors

Chapter 15 — Detection

Chapter 16 — Identification

Chapter 17 — Sensor Fusion

Chapter 18 — Battlefield Intelligence

Chapter 19 — Unknown Contacts

Chapter 20 — Stale Information

Chapter 21 — False Information

Chapter 22 — Communication Warfare

Chapter 23 — Electronic Warfare

Chapter 24 — Information Denial

Chapter 25 — Maintaining Information Superiority

PART IV — FORCE EMPLOYMENT

Chapter 26 — Force Organization

Chapter 27 — Ground Forces

Chapter 28 — Air Forces

Chapter 29 — Naval Forces

Chapter 30 — Command Forces

Chapter 31 — Experimental Forces

Chapter 32 — Combined Arms

Chapter 33 — Force Concentration

Chapter 34 — Force Dispersion

Chapter 35 — Reserve Forces

Chapter 36 — Support Forces

PART V — MANEUVER

Chapter 37 — Movement and Maneuver

Chapter 38 — Strategic Movement

Chapter 39 — Tactical Movement

Chapter 40 — Formation Movement

Chapter 41 — Terrain and Mobility

Chapter 42 — Dynamic Obstacles

Chapter 43 — Route Selection

Chapter 44 — Replanning

Chapter 45 — Flanking

Chapter 46 — Encirclement

Chapter 47 — Advance

Chapter 48 — Withdrawal

Chapter 49 — Retreat

Chapter 50 — Pursuit

PART VI — COMBAT DOCTRINE

Chapter 51 — Principles of Combat

Chapter 52 — Target Acquisition

Chapter 53 — Target Prioritization

Chapter 54 — Weapons Employment

Chapter 55 — Direct Fire

Chapter 56 — Projectile Warfare

Chapter 57 — Ballistic Engagements

Chapter 58 — Air Combat

Chapter 59 — Ground Combat

Chapter 60 — Naval Combat

Chapter 61 — Anti-Air Operations

Chapter 62 — Reconnaissance Combat

Chapter 63 — Defensive Fire

Chapter 64 — Suppression

Chapter 65 — Breaching

Chapter 66 — Combined-Arms Engagements

PART VII — AUTONOMOUS TACTICS

Chapter 67 — Autonomous Decision-Making

Chapter 68 — Tactical Autonomy

Chapter 69 — Strategic Autonomy

Chapter 70 — Threat Assessment

Chapter 71 — Risk Assessment

Chapter 72 — Target Selection

Chapter 73 — Formation Adaptation

Chapter 74 — Tactical Replanning

Chapter 75 — Autonomous Flanking
Chapter 76 — Autonomous Suppression
Chapter 77 — Autonomous Breaching
Chapter 78 — Autonomous Reconnaissance
Chapter 79 — Autonomous Pursuit
Chapter 80 — Autonomous Retreat
Chapter 81 — Reinforcement
Chapter 82 — Support Operations
Chapter 83 — Battlefield Adaptation

PART VIII — UNIT SURVIVAL

Chapter 84 — Damage
Chapter 85 — Armor
Chapter 86 — Penetration
Chapter 87 — Critical Damage
Chapter 88 — Component Damage
Chapter 89 — Disabled Systems
Chapter 90 — Mobility Loss
Chapter 91 — Weapon Failure
Chapter 92 — Sensor Failure
Chapter 93 — Communication Failure
Chapter 94 — Unit Destruction
Chapter 95 — Recovery Operations

PART IX — LOGISTICS AND SUSTAINMENT

Chapter 96 — The Logistics Battlefield
Chapter 97 — Resources
Chapter 98 — Resource Production
Chapter 99 — Resource Consumption

Chapter 100 — Storage
Chapter 101 — Fuel
Chapter 102 — Energy
Chapter 103 — Ammunition
Chapter 104 — Resupply
Chapter 105 — Repair
Chapter 106 — Recovery
Chapter 107 — Manufacturing
Chapter 108 — Fabrication
Chapter 109 — Salvage
Chapter 110 — Recycling

PART X — DEPLOYMENT OPERATIONS

Chapter 111 — Deployment Doctrine
Chapter 112 — Deployment Planning
Chapter 113 — Deployment Budget
Chapter 114 — Deployment Points
Chapter 115 — Force Composition
Chapter 116 — Deployment Zones
Chapter 117 — Deployment Restrictions
Chapter 118 — Deployment Eligibility
Chapter 119 — Forward Deployment
Chapter 120 — Reserve Deployment
Chapter 121 — Deployment Confirmation
Chapter 122 — Match Start

PART XI — BATTLEFIELD OPERATIONS

Chapter 123 — Reconnaissance
Chapter 124 — Security

Chapter 125 — Offensive Operations
Chapter 126 — Defensive Operations
Chapter 127 — Holding Positions
Chapter 128 — Securing Objectives
Chapter 129 — Attacking Objectives
Chapter 130 — Defending Objectives
Chapter 131 — Search Operations
Chapter 132 — Rescue Operations
Chapter 133 — Escort Operations
Chapter 134 — Patrol Operations
Chapter 135 — Reinforcement Operations
Chapter 136 — Withdrawal Operations

PART XII — INFORMATION-DENIED OPERATIONS

This should be one of the **signature sections** of the book.

Chapter 137 — Fighting Blind
Chapter 138 — Lost Sensors
Chapter 139 — Lost Communications
Chapter 140 — Unknown Enemy Forces
Chapter 141 — Stale Intelligence
Chapter 142 — Deception
Chapter 143 — Sensor Degradation
Chapter 144 — Network Collapse
Chapter 145 — Autonomous Operations Without Command
Chapter 146 — Re-establishing Battlefield Awareness

PART XIII — COMMANDER DECISION-MAKING

Chapter 147 — Reading the Battlefield
Chapter 148 — Identifying the Main Threat

Chapter 149 — Identifying the Main Effort
Chapter 150 — Managing Risk
Chapter 151 — Preserving Combat Power
Chapter 152 — Choosing When to Attack
Chapter 153 — Choosing When to Defend
Chapter 154 — Choosing When to Withdraw
Chapter 155 — Adapting Command Intent
Chapter 156 — Managing Autonomous Forces
Chapter 157 — Learning From Failure

PART XIV — VR OPERATIONS

Chapter 158 — VR Command
Chapter 159 — Operator Stations
Chapter 160 — Physical Controls
Chapter 161 — Ground Vehicle Operation
Chapter 162 — Air Vehicle Operation
Chapter 163 — Naval Operation
Chapter 164 — Sensor Operation
Chapter 165 — Targeting
Chapter 166 — Communications
Chapter 167 — Tactical Displays
Chapter 168 — Operator Safety and Comfort

PART XV — FACILITY OPERATIONS

Chapter 169 — Command Center
Chapter 170 — Fleet HQ
Chapter 171 — Main Hangar
Chapter 172 — Air Operations
Chapter 173 — Ground Vehicle Bay

Chapter 174 — Drone Operations
Chapter 175 — Command Unit Chamber
Chapter 176 — Experimental Containment
Chapter 177 — Naval Facility
Chapter 178 — Repair Operations
Chapter 179 — Fabrication Operations
Chapter 180 — Deployment Staging

PART XVI — MISSION EXECUTION

Chapter 181 — Mission Planning
Chapter 182 — Mission Briefing
Chapter 183 — Situation Assessment
Chapter 184 — Objective Planning
Chapter 185 — Force Assignment
Chapter 186 — Initial Deployment
Chapter 187 — Mission Execution
Chapter 188 — Battlefield Adaptation
Chapter 189 — Mission Completion
Chapter 190 — Mission Failure
Chapter 191 — After-Action Review

PART XVII — MULTIPLAYER COMMAND

Chapter 192 — Multiplayer Command
Chapter 193 — Team Organization
Chapter 194 — Shared Intent
Chapter 195 — Coordinated Operations
Chapter 196 — Combined Forces
Chapter 197 — Information Sharing
Chapter 198 — Command Conflicts

Chapter 199 — Team Communication

Chapter 200 — Network Disruption

Chapter 201 — Reconnection

Chapter 202 — Late Entry

Chapter 203 — Competitive Integrity

PART XVIII — AFTER-ACTION DOCTRINE

Chapter 204 — Battle Results

Chapter 205 — Tactical Review

Chapter 206 — Intelligence Review

Chapter 207 — Unit Losses

Chapter 208 — Resource Expenditure

Chapter 209 — Command Decisions

Chapter 210 — Autonomous Decisions

Chapter 211 — Critical Failures

Chapter 212 — Successful Adaptations

Chapter 213 — Lessons Learned

Chapter 214 — Preparing for the Next Engagement

PART XIX — FIELD REFERENCE

Chapter 215 — Unit Identification

Chapter 216 — Unit Roles

Chapter 217 — Weapon Identification

Chapter 218 — Sensor Identification

Chapter 219 — Command Symbols

Chapter 220 — Tactical Symbols

Chapter 221 — Status Indicators

Chapter 222 — Damage States

Chapter 223 — Communication States

Chapter 224 — Autonomy States
Chapter 225 — Combat States
Chapter 226 — Deployment States
Chapter 227 — Alert Levels

APPENDICES

Appendix A — Command Intent Quick Reference
Appendix B — Objective Quick Reference
Appendix C — Rules of Engagement
Appendix D — Formation Reference
Appendix E — Unit Classification
Appendix F — Weapon Classification
Appendix G — Sensor Classification
Appendix H — Damage States
Appendix I — Autonomous Behavior Reference
Appendix J — Resource Reference
Appendix K — Deployment Budget Reference
Appendix L — Tactical Symbols
Appendix M — Communication Codes
Appendix N — Battlefield Status Codes
Appendix O — Emergency Procedures
Appendix P — VR Controls
Appendix Q — Glossary
Appendix R — Abbreviations
Appendix S — Version History
Appendix T — Field Notes

The key difference from the Rule Book

The **Rule Book** should say:

“This is how Obsidian Protocol works.”

The **Field Manual** should say:

“This is how you command it.”

So the Field Manual should contain things the Rule Book doesn't emphasize:

tactical principles

commander doctrine

decision-making

battlefield examples

tactical diagrams

formations

operational scenarios

information-denied situations

autonomous behavior examples

deployment planning

after-action reviews

commander mistakes

successful tactical patterns

emergency procedures

quick-reference charts
